

Get Teyun Q24 Professional Audio Interface:

<https://www.aliexpress.com/item/1005003539992724.html>

In this video, we look at some features of the Teyun Q24 sound card, and how to connect and use it.

Teyun Q24 is a simple and affordable audio interface that works fine for beginner content creators. If you want to enhance the quality of audio you produce, get yourself a simple sound card or audio interface like this Teyun q24. A sound card helps you connect one or more XLR microphones and record from many devices.

This sound card has 2ins and 2outs, meaning you can connect two microphones and two output speakers and headphones.

The sound card can be paired with the Ausdom ANC1 headphones for sound monitoring.
